paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 180 Publisher: Beijing Normal University Pub. Date :2009-8-1. This book points on the two volumes published. Electromagnetic field theory on the book written by the Li Danian. the next book microwave engineering from the Li Danian. Yang Shuhui co-authored the book edited by the Li Danian. In writing this book the author for their request: the first is devoted to small. to explain to simple logic should be clear. the overall content should be appropriate. Close second is the theory with practice. not only describes some of the principles of individual devices. but with the combination of engineering systems. so that the students learned the course. only see the trees and see the forest. which for a number of wide caliber of professional of particular importance in their job search. The third is to try to do tedious mathematical derivation. so as not to lead in teaching the students tired. not in the proof of the theorem in the pursuit of mathematical rigor. Necessary to quote some special cases to prove. but to fully explain the physical meaning. The fourth is to open another chapter in the vector analysis do not have to introduce a separate. but combined with the integral curves in the higher mathematics and physics at the appropriate surface integral derivation process. the introduction of vector analysis and field theory in some of the basic concepts of vector analysis of some identities is needed in teaching before. as an exercise for the students to card out. so the students can deepen the impression. The fifth is to properly introduce some new technologies and new developments. such as electromagnetic fields numerical force method. smart antennas....
