

Transcription factors and skeletal muscle

Filesize: 3.08 MB

Reviews

This book might be worthy of a go through, and a lot better than other. it had been writtern really properly and helpful. You may like just how the author write this publication.

(Prof. Mattie Beatty)

TRANSCRIPTION FACTORS AND SKELETAL MUSCLE

To read **Transcription factors and skeletal muscle** eBook, remember to click the web link beneath and download the ebook or get access to other information which are have conjunction with TRANSCRIPTION FACTORS AND SKELETAL MUSCLE ebook.

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | New insights on the TEAD4 transcription factor | The TEAD family of transcription factors is composed of 4 paralogous genes (TEAD1-4) that regulate developmental processes, including myogenesis, and oncogenesis. In this thesis, we show that shRNA-mediated TEAD4 silencing in C2C12 cells causes differentiation defects characterized by shortened myotubes. We performed chromatin immunoprecipitation (ChIP) experiments coupled with hybridization to DNA microarrays (ChIP-chip) to identify TEAD4 target genes as well as RNA-seq to identify TEAD4 transcriptional regulatory network. TEAD4 occupies the promoters of 929 genes, including those of MyoD1 and Myogenin, and myogenic microRNAs. We show that TEAD4 directly induces expression of Myogenin, CDKN1A and Caveolin 3 to promote C2C12 cells differentiation. RNA-seq identifies a set of genes whose expression is strongly reduced upon TEAD4 knockdown amongst which are muscle structural and regulatory proteins and those required for the unfolded protein response (UPR). Preliminary analysis of TEAD4 expression in mouse skeletal muscle during regeneration corroborated these findings. Our study furthers the understanding of the TEAD4 function in the physiopathology of skeletal muscle. | Format: Paperback | Language/Sprache: english | 188 pp.
